OPINION OF SEMINAR

Everything was perfect, the activities and all the note taking. For myself I have a better and greater understanding of things about the participants especially when paying attention to detail rather than judging off of their attitude. I enjoyed myself and details being here and enjoying the presentations and discussions.

OPINION OF SEMINAR

Very informative and helpful. I learned a lot of new information that can be applied to our program to help our participants find and secure employment. Getting to know the participants on a personal level can be quite revealing in helping the job developers with placements that are not random. and matching their interests with a placement they will enjoy, enhancing their chances of getting hired. Thank you so much for sharing your extensive knowledge with us. :)
